Hungary

Children with Minor or No Identified Health Issue
Program Overview

- Married couples only
- Age 25-55
- Trip is 6 weeks for both parents
- Children are referred and rarely do we have waiting children
- Referral time is about 11 months currently (this could change)
- Children are 3 years and up (we have been seeing a lot of children between 3-6)
- Children with no identified health needs or children with minor needs.
- Cost is between $15,600 - $24,700
- Families can’t specify gender and need to be open to both
-Sibling groups of younger children
Typical Referrals in Hungary

- Minor or Correctable Health Issues
- Many surgical issues will already have been corrected
- Sibling groups of two or more
- Single children are usually boys
- Roma children or other ethnic minorities
Minor or Correctable Health Issues

This may include a variety of things. What we have seen referred are the following:

- Intestinal surgery
- Vaginal Agenesis
- Strabismus
- Nearsightedness
- Hyperactivity
- Developmental delays
- Leukemia
Hungary is a great program for families looking to adopt children who are between the ages of 3-8 with minimal needs. CHI has been working in Hungary since the mid-90s. We now have two in country representatives to handle the needs of our expanding program. We are excited to see our program continue to grow with new families.
